

Biogeochemist research position

A full-time research position for a biogeochemist is now open at the Kinneret Limnological Institute, Israel Oceanographic & Limnological Research (KLI-IOLR).

Scientific field: Biogeochemistry

Job Description: We seek a highly motivated independent researcher in the fields of biogeochemistry. The successful candidate is expected to conduct research in the field and the laboratory, using modern techniques and approaches.

The successful candidate is also expected to assume responsibility for components of the Lake Kinneret monitoring program and develop new monitoring focuses. The candidate is expected to cooperate with ongoing research projects at the KLI-IOLR, to actively seek research grants from national and international funding agencies to help support his/her research and publish in high impact peer-reviewed journals.

Requirements: The applicant should hold a Ph.D. degree in natural sciences, and at least one year of post-doctoral position in the field of geochemistry with research experience in the relevant field and a strong publication record.

Two steps in the position: Step A) During 2026 the successful candidate will start a post-doctoral position framework at KLI-IOLR, including several months of research and training in a leading limnological institute abroad. Following, Step B) At the beginning of 2027 the successful candidate will start a full-time research position at KLI-IOLR.

Advantages: post-doc, experience in planning and conducting independent research, proposal writing, management of research at a national and international level.

The candidate must currently be eligible to work in Israel.

The successful candidate will be positioned at the Kinneret Limnological Institute, IOLR.

Applications should be submitted with a CV, list of publications, degree certificates and the contact information of at least 2 referees. The application should be submitted to Ms. Edna Harari Avraham (ednah@ocean.org.il) by 1.7.2026 More information about IOLR can be found at www.ocean.org.il.
